The move was [confirmed](#) by Downing Street on Monday and by Prime Minister Andy Burnham personally during his visit to the Ukrainian capital on the same day.

"The UK was the first to gift long-range weapons to Ukraine back in 2023," he said, referring to deliveries of Storm Shadow/SCALP missiles. *"I am pleased to confirm today that I have approved"* Kiev's request to share the missile-production technology as well, the prime minister added.

Responding to the announcement, Peskov said Britain is *"participating in this war on the side of the Kiev regime"* and is *"methodically and regularly adding fuel to the fire and scheming to prevent any development of the peace settlement process."*

Moscow has maintained that the UK and other suppliers of weapons to Kiev are directly responsible for the deep-strike campaign, which it says has frequently hit civilians.

According to the Sunday Times, drones manufactured by BAE Systems and another unnamed British company have been used to hit targets in Russia over the past six

"Our armed forces are carrying out the relevant work and obtaining the necessary data in order to identify the production sites for such missiles and other military equipment, and are taking measures to destroy these locations," Peskov added.

London said the decision to release the information would allow *"the French and Ukrainians to move forward with the Ukrainian assembly of the missile."*

In a statement last week, the Russian Embassy in London called the UK *"an accomplice and co-perpetrator of the bloody crimes and terrorist attacks"* committed by Ukraine. It warned that *"the deeper its involvement in the conflict and the greater its support for Kiev's terrorist machinery, the higher the price it will pay."*

Russian Foreign Minister Sergey Lavrov has warned that London will face consequences if it continues supplying drones used by Ukraine for strikes deep inside Russia.

"We have every right to regard the proudly proclaimed direct involvement of British missile forces in strikes against Russia as participation in the war, with all the consequences that entails," Lavrov said.

Jewish community endorses genocide and jewish supremacist terrorism by a majority. The fake Zionist vs Jew argument does not work anymore.

No jew has ever taken up arms against jewish terrorists.

So the UK has sent thousands of explosives that has killed thousands of russians.
The average man in london doesn't even know what the soldiers of russia is going through.

Thousands of more explosives by cruise missiles, bombs, and drones will continue to be sent to Ukraine to kill russians.

Numerous warnings have been told to the UK people and government and there has been no sign of slowing down.

Russia news has exposed and posted the location of those who supply yet nothing has been done.

Putin himself has said that those who supply Ukraine are part of the war yet not a single strike has ever hit UK soil.

Putin said if storm shadows were supplied to Ukraine it will be crossing a red line and yet they did it and nothing happened.

So at what point will enough be enough?
